Subject: Inputs on Lok Sabha unstarred Question Diary no. 11464 to be answered on 26.03.2025

Respected Ma'am/Sir,

The undersigned is directed to forward the Lok Sabha Unstarred Question Diary no. 11464 due for 26.03.2025. It is requested to kindly provide the inputs for the same **latest by**

20.03.2025 to frame the reply. The texts of the question are reproduced as under:

Revised Quality Control Order for Solar PV Products

- (a) the details of scheduled timeline for the implementation of the Revised Quality Control Order for Solar PV Products;
- (b) the manner in which the Government is assisting manufacturers and suppliers in preparing for compliance with the new standards;
- (c) the details of the stakeholder consultations conducted during the revision process of the quality control order;
- (d) the manner in which the concerns of small and medium-sized enterprises addressed in these Consultations;
- (e) the manner in which the revised quality control order aims to support and enhance domestic manufacturing of solar PV modules, inverters and storage batteries;
- (f) the measures being taken to prevent potential supply chain disruptions during the transition to the new standards;
- (g) the systems details of being established to monitor the effectiveness of the revised quality control order in improving product reliability and safety; and
- (h) the initiatives planned to educate consumers about the new quality standards and the benefits of compliant solar PV products?

Thanks and Regards,

Rajkumar Bhawariya

LSUQ D. No. 11464_26.03.2025_NISE_20.03.2025.docx (22.4 kB)

Lok Sabha Unstarred Question Diary no. 11464 due for 26.03.2025

Inputs from National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Question (a) the details of scheduled timeline for the implementation of the Revised Quality Control Order for Solar PV Products;

Reply to (a):

The revised Quality Control Order (QCO) for solar PV products shall come into force on the expiry of 180 days from its publication in the Official Gazette of India vide Gazette Notification dated 27.01.2025.

Question (b) the manner in which the Government is assisting manufacturers and suppliers in preparing for compliance with the new standards;

Reply to (b):

The revised QCO has been notified by MNRE after due consultations with all the relevant stakeholders including manufacturers and test labs. They have been apprised well in advance about the compliance requirements of the revised QCO and are expected to be ready by the time it is implemented.

NISE test labs are equipped for testing as per the revised QCO and their NABL accreditation is currently under process. When revised QCO comes into force NISE test lab will be ready for testing in compliance with the new standards.

Question (c) the details of the stakeholder consultations conducted during the revision process of the quality control order;

Reply to (c):

MNRE and BIS may provide details.

Question (d) the manner in which the concerns of small and medium-sized enterprises addressed in these Consultations;

Reply to (d):

The provision for lower minimum efficiency of 17% for poly crystalline Si modules has been kept in the revised QCO. Generally, these older technology poly crystalline Si modules are

manufactured by small and medium manufacturers. This way such manufacturers will be able to comply with the revised QCO.

Additionally, implementation of revised QCO shall not affect the validity of the licence of existing goods or articles having valid licence as per the provisions of current 2017 QCO. This will give small and medium manufacturers more time to adopt the revised QCO.

Question (e) the manner in which the revised quality control order aims to support and enhance domestic manufacturing of solar PV modules, inverters and storage batteries;

Reply to (e):

As per the revised QCO, the manufacturers who want to sell eligible products in India need to mandatorily do testing as per Indian standards (IS). Imported products tested outside India are also required to be tested in India as per IS standards, which will increase the cost per Wp for imported products. In this manner the QCO will indirectly encourage domestic manufacturing.

Question (f) the measures being taken to prevent potential supply chain disruptions during the transition to the new standards;

Reply to (f):

Implementation of revised QCO shall not affect the validity of the licence of existing products having valid licence as per the provisions of current 2017 QCO. This way, the manufacturers will get sufficient time to get their module tested as per new QCO. This will prevent potential supply chain disruptions during the transition to the new standards.

Question (g) the systems details of being established to monitor the effectiveness of the revised quality control order in improving product reliability and safety;

Reply to (g):

Bureau of Indian Standards (BIS) shall be the certifying and enforcing authority for revised QCO. The market surveillance to ensure the conformity to revised QCO shall be conducted by the BIS or Agencies notified by the BIS in consultation with MNRE.

Question (h) the initiatives planned to educate consumers about the new quality standards and the benefits of compliant solar PV products?

Reply to (g):

MNRE has published the revised QCO well in advance and wide publicity is being given on different platforms for its wider outreach.

LSQ D. No. 8030_19.03.2025_NISE_12.03.2025.docx (20.4 kB)

Lok Sabha Starred Question Diary no. 8030 due for 19.03.2025

Inputs from National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Question (a) whether the Government concurs with the view that through encouraging domestic value addition and ensuring adherence to quality standards in renewable energy technologies, the country can bridge the gap between sustainability and affordability;

Reply to (a):

By encouraging the localization of entire solar manufacturing value chain through schemes like PLI in solar manufacturing the government expects to reduce the dependency of raw materials imports. This will ensure not only sustainable supply of raw materials, but also reduction in cost of raw materials, thereby making the solar PV modules and ultimately the solar energy cheaper.

Question (b) if so, the details of the steps that are proposed to be taken by the Government in this regard and if not, the reasons therefor;

Reply to (b):

Recent quality compliances (BIS, star labelling, high efficiency PV modules) are directed towards ensuring prolonged life of solar PV systems installed in the country. The improved lifetime operation will ensure comparable Levelized cost of energy for solar electricity.

Question (c) the manner in which new and renewable energy technologies be made more affordable and accessible for rural communities?

Reply to (c):

Over the years, the government has taken many steps to make the solar energy available at a cheaper price to common public including rural communities. One such step is the favourable policies to push domestic manufacturing of high quality PV modules, which will bring down the cost of PV modules and increase the affordability of solar energy. Other steps which directly reduce the cost for common public include various subsidy schemes. PM Surya Ghar Muft Bijli Yojna is one such scheme where households are provided a subsidy to install solar panels on their roofs. PM KUSUM is another scheme, which is particularly aimed at ensuring energy security for farmers in India. This scheme provides financial assistance in the form of a subsidy to farmers to set up solar pumps and grid-connected renewable energy-based power plants.

Subject: Rajya Sabha Provisionally Admitted Question Dy. No. Dy. No. S7563 for 01/04/2025 regarding Renewable Energy Jobs and Training Initiatives

Dear Sir/Madam,

Please find attached a copy of Rajya Sabha Provisionally Admitted Question Dy. No. Dy. No. S7563 for 01/04/2025 regarding Renewable Energy Jobs and Training Initiatives. NISE, NIWE, NIBE, SCGJ are requested to kindly furnish point wise reply of the Rajya Sabha Question latest by 24th March, 2025 positively.

This may please give Top Priority.

With regards,
HRD Division, MNRE

PROVISIONALLY ADMITTED QUESTION FOR THE RAJYA SABHA

Starred /Unstarred Diary No.-- S7563

Renewable Energy Jobs & Training Initiatives

(a) How many jobs have been created in the renewable energy sector in the past five years, and what are the key employment trends in this sector?

The Ministry of New and Renewable Energy (MNRE) has entrusted the National Institute of Solar Energy (NISE) with the responsibility of coordinating and implementing the Suryamitra Skill Development Programme through Empanelled Training Centres for imparting Suryamitra training programme throughout the India.

Details of Employment Generated by NISE through the Suryamitra Skill Development Programme.

LS-U7239.docx (12.4 kB)

The Ministry of New and Renewable Energy (MNRE) extended significant support to the National Institute of Solar Energy (NISE) for the establishment of advanced research laboratories and facilities in the field of solar energy.

Under the guidance and funding of MNRE, NISE has established several state of the art testing facilities to ensure quality control of solar energy products and systems in the country. These facilities include:

Solar PV Module Test Facility

Solar Water Pumping Test Facility

Solar Power Converter Test Facility

Solar Lighting Test Facility

Battery testing facility

Solar thermal testing facility

Reference device (primary) calibration

MNRE has also funded the demonstration of green hydrogen production, storage, and dispensing facilities at NISE, showcasing its dedication to exploring cutting-edge sustainable energy solutions. Additionally, the Ministry supported NISE in establishing an Advanced Solar Cell Characterization Laboratory. This laboratory focuses on the development of high-efficiency Passivated Emitter and Rear Cell (PERC) solar cells, a key step towards enhancing the performance and efficiency of solar technologies. These initiatives underscore MNRE's commitment to advancing renewable energy research and fostering self-reliance in critical solar and hydrogen technologies.

Complementing this, the Department of Science and Technology (DST) has supported NISE by awarding the project for the development of Secondary Reference Solar Cells, which play a crucial role in the accurate calibration of solar energy systems.

These initiatives reflect the collaborative efforts of MNRE and DST in advancing research and innovation in renewable energy technologies, thereby strengthening India's capacity for sustainable energy solutions.

LSQ D. No. 5278_02.04.2025_NISE_28.03.2025.docx (19.8 kB)

Lok Sabha Unstarred Question Diary no. 5278 due for 02.04.2025

Inputs from National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Question (a) whether the Ministry has launched pilot projects for hydrogen-fuelled vehicles under the National Green Hydrogen Mission (NGHM) and if so, the details thereof, State and location-wise along with the funds sanctioned for each of the said projects;

Reply to (a):

Under NGHM, MNRE has launched pilot projects for hydrogen-fuelled vehicles, being implemented by SECI. NISE does not have the exact data and same may be provided by SECI/MNRE.

Question (b) the measures in place to develop hydrogen refuelling infrastructure and the total number of hydrogen refuelling centres across India;

Reply to (b):

Under NGHM, MNRE has launched schemes to develop hydrogen refuelling infrastructure being implemented by SECI. Currently, there are three hydrogen refuelling station in India: (i) NISE, Gurugram, (ii) IOCL, Faridabad and (iii) NTPC, Leh.

NISE Green Hydrogen Production cum refuelling Station: The refuelling station was commissioned in October 2015 under MNRE funded project. Currently, it is not operational due to technical issues. NISE is in the process of making the station operational.

Question (c) the specific steps taken by the Government to make hydrogen-fuelled vehicles cost effective?

Reply to (c):

Under NGHM, MNRE has launched various incentive schemes like SIGHT, etc. NISE does not have the exact data and same may be provided by MNRE.

Sir,

Please find attached Lok Sabha Unstarred Question DY. No. 5801 regarding Skill Development and Entrepreneurship, due for answer on 09.12.2024, for inputs. It is requested to provide the inputs at the earliest.

2. NISE is also requested to give detailed reply for part (d) of the question regarding Number of youths provided skill development training in Barmer-Jaisalmer Parliamentary

Constituency and the expenditure incurred for this purpose and number of local youths provided employment.

Regards,

Gitanjali Virmani
US/HRD

LOK SABHA

Ministry: SKILL DEVELOPMENT AND ENTREPRENEURSHIP

Sitting on: 09/12/2024

Question Type: UNSTARRED

D.No : 5801

Skill development opportunities to Youths

Will the Minister of SKILL DEVELOPMENT AND ENTREPRENEURSHIP

- (a) the details of the schemes being implemented by the Union Government for providing opportunities to the youths in the field of skill development and entrepreneurship in Rajasthan and the current status of targets achieved in this regard;
- (b) whether the Government proposes to provide training and employment to youths by setting up training centres at sub-division level for skill development in Rajasthan;
- (c) if so, the details thereof and the steps being taken/proposed to be taken by the Government to boost the pace of skill development and entrepreneurship sector; and
- (d) the number of the youths provided skill development training in Barmer-Jaisalmer Parliamentary Constituency and the expenditure incurred for this purpose along with the number of local trained youths provided employment in various companies functioning in the fields of Refinery, Oil Gas, Mining and Solar?

SEA(NS) / Policy Division

LOKSABHA
Ministry: SKILL DEVELOPMENT AND ENTREPRENEURSHIP
Sitting on:09/12/2024
Question Type:UNSTARRED
D.No : 5801

Skill development opportunities to Youths

(a) the details of the schemes being implemented by the Union Government for providing opportunities to the youths in the field of skill development and entrepreneurship in Rajasthan and the current status of targets achieved in this regard;

Ans. Name of the Programme: Suryamitra

The Suryamitra Skill Development Programme is a commendable initiative by the Ministry of New and Renewable Energy (MNRE) in 2015 to address the skill gap in the renewable energy sector, particularly in solar photovoltaic (PV) systems. In that training of technicians for system design, installation, operation, maintenance and repair of solar photovoltaic (PV) systems at grass root level.

Sl. (b) whether the Government proposes to provided training and employment to youths by setting up training centres at sub-division level for skill development in Rajasthan;

Ans. Yes, the Ministry of New and Renewable Energy (MNRE) has entrusted the National Institute of Solar Energy (NISE) with the responsibility of coordinating and implementing the Suryamitra Skill Development Programme through Empanelled Training Centres for imparting Suryamitra training programme throughout India.

This strategic collaboration ensures the systematic and effective training of technicians to support India's expanding solar energy sector.

Achievements of the Suryamitra Programme **(Till November 30, 2024):**

- Total Trained Suryamitras: 57,372 individuals have completed the training programme.
- Placement Success: Of these, 28,472 Suryamitras have secured employment in the solar energy sector, showcasing the program's impact on workforce development and job creation.

(c) if so, the details thereof and the steps being taken/proposed to be taken by the Government to boost the pace of skill development and entrepreneurship sector; and

Ans. The following Training Centres Empanelled for the implementation Suryamitra programme at Rajasthan in FY 2024-25

(d) the number of the youths provided skill development training in Barmer-Jaisalmer Parliamentary Constituency and, the expenditure incurred for this purpose along with the number of local trained youths provided employment in various companies functioning in the fields of Refinery, Oil Gas, Mining and solar?

Ans. 56 youth trained at **Barmer** under the Suryamitra skill development programme and Rs. 19, 07, 157/- fund utilized for the same.

Youth's Employment Is in progress.

1. Training Partner: Modus Globalray Services LLP (FY 2022-23)

Total Participants: 29

Expenditure : Rs 10,21,213/-

2. Training Partner : Modus Globalray Services LLP (FY 2021-22)

Total Participants: 29

Expenditure : Rs 8,85,944/-

LSUQ Dy. No. 5252 07.08.2024_NISE.docx (27.5 kB)

Lok Sabha Questions & Answers
National Institute of Solar Energy,
Control Organization: Ministry of New and Renewable Energy

Subject: Admitted Question Dy. No. 5252 due for the answer on 07-08-2024 regarding potential of solar energy in the country.

Question a) Whether the Government has carried out any assessment of the land available for setting up solar power projects in different parts of the country; and
b) if so, the details thereof;

Reply to a) and b): The Solar Potential Map of India was published in 2014 by National Institute of Solar Energy (NISE), an autonomous institute of Ministry of New and Renewable Energy. The methodology and assumptions used for the potential estimation in the 2014 map are detailed in the **Annexure I** (attached). The estimation involved identifying potential areas on wasteland for solar energy generation, calculating rooftop solar potential for urban areas, and summing up the total solar potential for each state. The detailed state-wise solar potential for India in gigawatts peak (GWp) is provided in the attached **Annexure II**. The total solar potential for the entire country is estimated at 748.98 GWp.

With the advancement in technology (SPV module efficiency) and consideration of other factors affecting the deployment of solar power plant such as Slope, aspect, GHI etc, NISE is in process of upgrading the previous solar potential map of the country. NISE is likely to complete the exercise in FY 2024-25.

Notably, NISE has collaborated with the National Remote Sensing Centre (NRSC), an entity under the Indian Space Research Organisation (ISRO), to enhance the accuracy and comprehensiveness of the solar potential map.

Question c) Whether the Government proposes to use barren land for the said purpose; and
d) if so, the details thereof;

Reply to c) and d): The assumption of wasteland was considered for the quantification of the solar potential of India in 2014.

The methodology and assumptions used for the potential estimation in the 2014 map are detailed in the **Annexure I**.

Methodology and assumption/ approximations used to arrive at the potential estimation:

To estimate the solar potential of the country (attached at Annexure II), the National Institute of Solar Energy (NISE) made certain assumptions and approximations. The details are as follows:

- **Identifying potential areas for solar power plants on wasteland:** NISE used the wasteland data published in the Wasteland Atlas of India 2010, which was provided by the Department of Land Resources, Ministry of Rural Development, and the National Remote Sensing Centre, ISRO. The assumption was made that 3% of the wasteland could be used for solar power projects. The area of solar power plants on wasteland was calculated based on this assumption.
- **Estimating solar potential based on wasteland:** The solar potential based on the wasteland was determined by considering a standard photovoltaic (SPV) module efficiency of 15%. It was assumed that a 1 square kilometer of wasteland could accommodate a 50 MWp (Mega Watt peak) SPV power plant.
- **Calculating rooftop solar potential:** The potential of putting up solar power plants on rooftops was calculated using the urban data from the Census of India 2011, provided by the Ministry of Home Affairs. The table provided below specifies the percentage (X) of different categories of buildings that can be installed with a certain capacity (Y) of SPV power. Multiplying the total number of buildings in each category by the percentage and capacity values gave the rooftop solar potential for each category.

Category	X (%)	Y (kWp)
Factory, Workshop, Workshed etc.	20	50
Hospital, Dispensary etc.	2	100
Hotel, Lodge, Guest house etc.	20	10
Place of worship	2	50
School, College	10	50
Shop, Office	25	1
Other non-residential (power plant, cinema hall etc.)	10	10
Residential	20	1

- **Total solar potential estimation:** The solar potential based on wasteland and the rooftop solar potential for each state were added together to arrive at the total solar potential in GWp for each state. The same calculation was done for all the states, and the results were summed up to obtain the total solar potential of the country.

Annexure II

Table I: State-wise Solar Potential of India (2014)

State	Waste land (sq km)	Solar power plant area (sq km)	Solar potential based on wasteland (GWp)	Rooftop (GWp)	Total solar potential (GWp)

Sir/Madam,

I am directed to reproduce Rajya Sabha Unstarred Question Diary no. 4962 due for 18.03.2025. It is requested to kindly provide the reply of latest by 10.03.2025.

Solar Energy

- (a) whether India is one of the richest country in terms of potential solar energy and if so, the details thereof;
- (b) whether high cost of solar energy producing equipment is hindering the rapid growth of solar energy in the country;
- (c) if so, the details thereof and steps taken/being taken by the Government to make these equipment available at cheaper price to common public; and
- (d) whether the Government has identified the potential wind power, solar power and hydro power sites that have not been exploited so far in the country and if so, the details thereof, location-wise?

Regards..

Ms. Seema Srivastava,

Under Secretary,

Ministry of New and Renewable Energy,

RSQ D. No. 4962_18.03.2025_NISE.docx (22 kB)

Rajya Sabha Unstarred Question Diary no. 4962 due for 18.03.2025

Inputs from National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Question (a) whether India is one of the richest country in terms of potential solar energy and if so, the details thereof;

Reply to (a):

Yes, India is among the countries with the highest potential for solar energy. National Institute of Solar Energy (NISE) has assessed India's solar potential to be approximately 748 gigawatts (GW) in 2014, assuming that 3% of the wasteland area is utilized for solar photovoltaic (PV) installations. NISE has also upgraded the solar potential in 2024 and the assessment report has been submitted to MNRE for further consideration.

The country's geographical location endows it with vast solar energy potential, with most parts receiving 4-7 kWh per square meter per day¹.

Question (b) whether high cost of solar energy producing equipment is hindering the rapid growth of solar energy in the country;

Reply to (b):

The cost of solar energy producing equipment, i.e., solar PV modules has reduced significantly in the country over the past few years and currently is in the range of 15-25 Rs/Wp, which makes it a cheaper source of energy compared to other fossil fuel based energy sources. The installed solar energy capacity in the country is also increasing rapidly. During the year 2023-24, ~15 GW of solar energy capacity was installed, while during the year 2024-25, ~18.5 GW has already been installed till 31.01.2025².

Question (c) if so, the details thereof and steps taken/being taken by the Government to make these equipment available at cheaper price to common public; and

Reply to (c):

Over the years, the government has taken many steps to make the solar energy producing equipment, i.e., solar PV modules available at a cheaper price to common public. One such step is the favourable policies to push domestic manufacturing of high quality PV modules. India has established significant manufacturing capacity of PV modules, which stands at ~67 GW with 97 ALMM (Approved List of Models and Manufacturers) enlisted manufacturers³.

¹ <https://mnre.gov.in/en/solar-overview/>

² <https://mnre.gov.in/en/year-wise-achievement/>

³ As per the latest ALMM list published on 17.02.2025, available at <https://mnre.gov.in/en/approved-list-of-models-and-manufacturers-alm/>.

Other steps which directly reduce the cost for common public include various subsidy schemes. PM Surya Ghar Muft Bijli Yojna is one such scheme where households are provided a subsidy to install solar panels on their roofs. The subsidy given is Rs. 30,000/- per kW of installed solar PV with a maximum of Rs. 78,000/- for a 3 kW capacity.

(Other details or schemes may be included by MNRE as required)

Question (d) whether the Government has identified the potential wind power, solar power and hydro power sites that have not been exploited so far in the country and if so, the details thereof, location-wise?

Reply to (d):

The solar potential map of India was initially published by NISE in 2014. The estimation involved identifying potential areas on wastelands, assessing rooftop solar potential in urban areas, and calculating the total solar potential for each state, which cumulatively amounted to 748.98 GWp.

In light of technological advancements and evolving factors, NISE, in partnership with the National Remote Sensing Centre (NRSC), a division of the Indian Space Research Organisation (ISRO) has upgraded this map to include ground-mounted solar PV plants, and the utilization of water bodies for solar energy generation. The report has been submitted to the Ministry of New and Renewable Energy (MNRE) for review and approval.

Subject: International Collaboration and Technology Transfer

Sir,

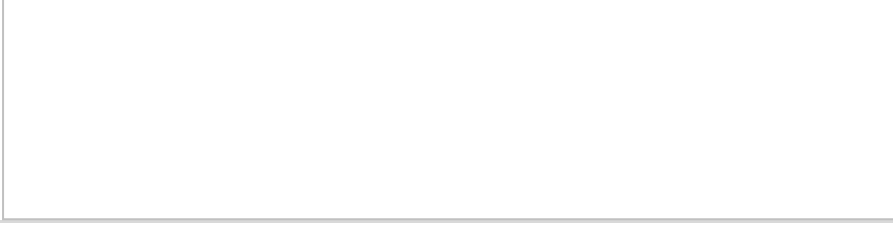

It is requested to kindly provide inputs for below mentioned Rajya Sabha Question Dy. No. 2737 to be put up for 17.12.2024:

- (a) Details of International partnerships and technology transfer agreements established to support renewable energy development in India, particularly in the solar and wind energy sectors;
- (b) Outcomes of these collaborations in terms of knowledge transfer, technology sharing, and joint research initiatives;
- (c) key impact of these partnerships on enhancing domestic manufacturing capabilities and reducing reliance on imported renewable energy technologies;
- (d) whether the Government has any future plans to expand international cooperation in renewable energy, including potential new partnerships and areas of focus?

This is kindly be treated as urgent and of top priority.

With Regards,

अंतराष्ट्रीय संबंध प्रभाग/ International Relations Division
नवीन और नवीकरणीय ऊर्जा मंत्रालय/ Ministry of New and Renewable Energy
भारत सरकार/ Government of India
Tele: 011-20849137

RSQ D. No. 2737_17.12.2024_NISE.docx (21.3 kB)

Rajya Sabha Question Dy. No. 2737 to be put up for 17.12.2024

Inputs from National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Question (a) Details of International partnerships and technology transfer agreements established to support renewable energy development in India, particularly in the solar and wind energy sectors;

Reply to (a):

Details of International partnerships –

Under the umbrella of Indo-German Cooperation, National Institute of Solar Energy (NISE), which is an autonomous institute of Ministry of New and Renewable Energy (MNRE) and Physikalisch-Technische Bundesanstalt (PTB), which is the national metrology institute of the Federal Republic of Germany are implementing the project "Strengthening of Quality Infrastructure for the Solar Industry". Broad objective of the cooperation is to "Develop the quality infrastructure services needed by the photovoltaic sector in India and support the use of the services for assuring the quality and reliability of solar photovoltaic systems."

Question (b) Outcomes of these collaborations in terms of knowledge transfer, technology sharing, and joint research initiatives;

Reply to (b):

The partnership between NISE and PTB has helped in strengthening the Quality Infrastructure for PV sector in India. Key activities performed under this collaboration and the outcome of the same is highlighted below:

- Conformity assessment – Workshop organized for testing of PV module, inverter and PV power plant. Training of lab personnel done.
- Calibration – PTB has supported NISE on know-how for indoor calibration of pyranometers. Round robin of cells and PV modules initiated with involvement of other institutes/labs including NPL Delhi, IIT Bombay, CPRI Bengaluru and Fraunhofer ISE.
- Proficiency testing (PT) – PTB is supporting NISE in providing expertise from IFM Australia in developing NISE as a PT Provider for PV module testing in India.
- Quality Control Mechanism for PV plants – PTB supported in Development of a checklist for PV Power plant analysis to be used by IREDA. Pilot Testing with IREDA, SECI, NISE and other private labs has been completed.
- Accreditation activities – PTB has organized training to NABL staff & NABL assessors on ISO 17025 and also the training of trainers to NABL Training Dept. (Training by UK accreditation body: UKAS).

- Lab Network – PTB and NISE jointly established a network of labs to provide a platform to all the solar PV labs to raise common issues. Frequent Lab network meetings are being organized under the leadership of NISE to discuss different issues of the testing labs.
- Establishment of test facilities – NISE and PTB are jointly working to establish a test facility for reliability testing of battery at NISE.

Question (c) Key impact of these partnerships on enhancing domestic manufacturing capabilities and reducing reliance on imported renewable energy technologies;

Reply to (c):

Skill development and capacity building are critical for strengthening domestic manufacturing of solar PV in the country. Activities performed under the collaborative partnership of NISE and PTB have helped in sharing of technical know-how related to manufacturing and testing of solar related technologies. NISE and PTB, together with ACRI Hyderabad recently organized a workshop on ‘Improving Battery Energy Storage Systems (BESS) in India’, which saw active participation from various stakeholders in the domain, including manufacturers, test labs, and R&D institutes.

Question (d) Whether the Government has any future plans to expand international cooperation in renewable energy, including potential new partnerships and areas of focus?

Reply to (d):

NISE is in the process of expanding international collaborations in the upcoming areas of renewable energy. Some of the potential international partnerships that are likely to materialize in near future include the following:

- Collaboration between NISE and Swedish Energy Agency in the field of Green Hydrogen – Official from Swedish Energy Agency have visited NISE and discussions are underway on the possible synergies and areas of collaboration.
- Collaboration between NISE and Solar Energy Research Center (ISC) Konstanz, Germany – A memorandum of understanding (MoU) is being finalized with objectives including capacity building in upstream solar PV manufacturing and development of advanced characterization methodologies for next generation PV technologies.
- Collaboration between NISE and Fraunhofer Institute of Solar Energy (ISE), Germany – A memorandum of understanding (MoU) is being finalized for collaboratively working on research and capacity building in different areas of solar PV, solar thermal and hydrogen & fuel cells.

RS Parl. Q Dy. 2123 for 4.12.2024 (1).pdf (246 kB)

Provisionally Admitted Questions in Rajya Sabha

unstarred Diary No. - 2123

The Question will be put down for 04/12/2024

Answer on the Ministry Department - Skill Development and Entrepreneurship

Glaring skill gap in the renewable energy sector;

- (a) whether it is a fact that India's renewable energy sector is experiencing unprecedented growth and is expected to create approximately 1.7 million jobs over the next three years;
- (b) despite this potential for job creation, there is a glaring skill gap of more than million jobs in the renewable energy sector;
- (c) whether this disparity highlights the urgent need for skilling/reskilling and strengthening apprenticeship programme to meet work force demands;
- (d) if so; the details thereof; and the steps taken by Government to meet work force demand in the renewable sector; give details?

JS(SM) / JD(SG)

Causes of the Gap

- **Educational Mismatch:** Traditional engineering and technical programs often don't align with the latest renewable energy needs.
- **Rapid Industry Growth:** The sector is expanding faster than the workforce can adapt.
- **Regional Disparities:** Many renewable projects are located in rural or remote areas, but most skilled workers reside in urban centers.
- **Lack of Awareness:** Potential candidates may lack understanding of career opportunities in the sector.

Key Areas of the Skill Gap

1. Technical Expertise

- Demand for specialists in solar, wind, geothermal, and energy storage far exceeds supply. Roles like electrical engineers, renewable energy technicians, and software developers are particularly affected.
- Lack of expertise in managing advanced technologies like smart grids and energy-efficient systems.

2. Data and Digital Skills

- Increasing reliance on AI, IoT, and big data in optimizing renewable energy systems requires expertise in data science and digital engineering.
- Skills in predictive analytics and cybersecurity are critical for managing modern renewable infrastructure.

3. Policy and Regulatory Knowledge

- Understanding renewable energy policies, permitting processes, and international standards is vital for project developers and compliance managers.
- Shortages of experts who can navigate the legal and bureaucratic landscapes.

4. Project Management and Financing

- Gaps in skills related to renewable project financing, supply chain management, and scaling solutions effectively.

Impacts

- **Delayed Projects:** Many renewable energy installations face delays due to a lack of skilled workers.

- **Increased Costs:** Scarcity drives up labor costs, affecting project budgets and timelines.
- **Missed Climate Goals:** A shortage of skilled professionals may hinder the global transition to cleaner energy.

Solutions

Education and Training

Develop specialized programs in universities and technical colleges focusing on renewable energy technologies.

Expand Short term training programmes for on-the-ground skills like solar panel installation.

Upskilling and Reskilling

Offer industry professionals opportunities to transition to renewable energy roles.

I. Short Term Trainings and skill Development in Renewable Energy

1. Solar PV Technician (Suryamitra Skill Development) Programme

Training of technicians for system design, installation, operation, maintenance and repair of solar photovoltaic (PV) systems at grass root level:

The **Suryamitra Skill Development Programme** is a commendable initiative by the Ministry of New and Renewable Energy (MNRE) in 2015 to address the skill gap in the renewable energy sector, particularly in **solar photovoltaic (PV)** systems. By focusing on training technicians at the grassroots level, the Suryamitra Skill Development Programme plays a pivotal role in ensuring the availability of a skilled workforce critical to achieving India's net-zero targets by 2070. This initiative supports the deployment, operation, and maintenance of renewable energy systems, particularly solar power, which is a cornerstone of India's clean energy transition.

The **Ministry of New and Renewable Energy (MNRE)** has entrusted the **National Institute of Solar Energy (NISE)** with the responsibility of coordinating and implementing the **Suryamitra Skill Development Programme**. This strategic collaboration ensures the systematic and effective training of technicians to support India's expanding solar energy sector.

Achievements of the Suryamitra Programme (Till March 31, 2024):

- **Total Trained Suryamitras:** 56,507 individuals have successfully completed the training program.

- **Placement Success:** Of these, **26,967 Suryamitras** have secured employment in the solar energy sector, showcasing the program's impact on workforce development and job creation.
- **Nationwide Reach:** Training has been conducted through a network of partners and centers across the country, ensuring widespread access and regional inclusivity.

Key Contributions:

Workforce Readiness: The program has created a pool of skilled technicians to support the installation, commissioning, operation, and maintenance of solar power systems.

Employment Opportunities: Nearly 50% placement reflects the program's effectiveness in bridging the gap between skill development and industry needs.

Regional Development: By decentralizing training centers, the program has reached rural and semi-urban areas, enabling local communities to participate in the renewable energy transition. With such a robust foundation, the Suryamitra programme is well-positioned to meet future targets, including the 12,800 skilling goal for FY 2024-25, and contribute significantly to India's renewable energy ambitious goal of 280 GW of solar power capacity by 2030 and net-zero commitments.

2. Solar Water Pumping Training (Varunmitra Skill Development) Programme

Solar PV water pumping systems are a key application of solar energy, addressing irrigation needs sustainably and efficiently. Under the PM-KUSUM scheme, the government aims to incentivize farmers to:

Transition to solar-powered water pumps for irrigation, reducing dependence on conventional fuels.

Utilize barren land for solar power generation, providing an additional income stream.

However, the large-scale installation, commissioning, and maintenance of these systems require a skilled workforce, leading to the establishment of the Varunmitra Programme as a complementary initiative to the Suryamitra Skill Development Programme.

Objectives of the Varunmitra Programme

The **Varunmitra Programme** is designed to:

- Train individuals in the **design, installation, and commissioning** of solar water pumping systems.
- Provide skills for **operation, safety, troubleshooting, and maintenance** of these systems.
- Build a pool of skilled technicians to support the rapid rollout of solar water pumps under PM-KUSUM.

Achievements of the Varunmitra Programme (Till March 31, 2024)

Total Trained Varunmitras: 1,266 individuals have successfully completed the training program.

Nationwide Reach: A network of training centers and partners ensures regional inclusivity and wide Future Targets

For FY 2024-25, the programme has set a skilling target of 510 individuals, contributing to the manpower needed for the increasing demand for solar water pumps.

By addressing the need for a skilled workforce in solar water pumping systems, the Varunmitra Programme ensures the success of initiatives like PM-KUSUM, while also fostering rural development and environmental sustainability.

II. Upskilling and Reskilling

1. PM Surya Ghar: Muft Bijli Yojana – Empowering Residential Solar Adoption

The Government of India's approval of the PM Surya Ghar: Muft Bijli Yojana on February 29, 2024, marks a significant milestone in promoting solar rooftop installations in the residential sector. With an ambitious budget of ₹75,021 crore, the scheme aims to:

- **Boost Solar Rooftop Capacity:** Increase the share of rooftop solar systems in India's renewable energy portfolio.
- **Empower Households:** Enable residential households to generate their own electricity and reduce dependency on grid power, fostering energy independence.

The program is set to be implemented until FY 2026-27, aligning with India's broader renewable energy and net-zero goals.

Workforce Requirement

To achieve the target of 1 crore residential rooftop installations, approximately 1 lakh installation teams, each comprising 3-4 skilled technicians, will be needed. This highlights the critical importance of training and skill development to meet the program's workforce demand.

Significance of the Training Programme

- **Employment Generation:** The program will create jobs for over 3–4 lakh technicians, providing significant economic opportunities, especially in rural and semi-urban areas.
- **Efficient Implementation:** A skilled workforce is crucial to meeting the ambitious target of 1 crore rooftops by FY 2026-27.
- **Support for Renewable Transition:** Trained technicians will ensure high-quality installations, maximizing the efficiency and longevity of rooftop systems.

- **Consumer Empowerment:** Skilled personnel will provide households with the confidence to adopt solar systems by ensuring reliable installation and maintenance services.

The PM Surya Ghar: Muft Bijli Yojana and its associated training initiatives represent a significant step toward India's renewable energy aspirations, fostering energy independence, job creation, and environmental sustainability.

NISE Training Modules for Solar Rooftop Installations

To support the ambitious goals of the PM Surya Ghar: Muft Bijli Yojana and address the demand for a skilled workforce, the National Institute of Solar Energy (NISE) developed and proposed training modules. These were officially approved by the Ministry of New and Renewable Energy (MNRE) on October 9, 2024, and implementation is now underway.

Training Modules Approved by MNRE

a. Solar PV Installers

Target: 20,000 candidates

Objective: Train individuals in the installation of solar PV systems, focusing on safety, efficiency, and quality.

b. Rooftop Solar Supervisors

Target: 10,000 candidates

Objective: Equip supervisors with advanced knowledge for overseeing rooftop solar installations, including project management, troubleshooting, and compliance.

c. On-the-Job Training (OJT) for Trained Installers/Suryamitras

Target: 25,000 candidates

Objective: Provide practical, hands-on experience to existing trained personnel, enhancing their skills for real-world challenges.

Implementation Plan

Approval Date: October 9, 2024

Allotment Letters were issued to 420 Training Centres across the country.

Training Capacity: The sanctioned program aims to train a total of 55,000 candidates, aligning with the MNRE's targets for workforce readiness in the solar rooftop sector.

Impact of the Training Modules

- **Enhanced Workforce Readiness:** A diverse range of training ensures all levels of expertise are covered, from installers to supervisors.

- **Nationwide Reach:** With 420 training centers, the program ensures widespread accessibility and regional inclusivity.
- **Support for Solar Expansion:** The initiative aligns with the target of 1 crore rooftop installations by building a skilled and capable workforce.
- **Economic Growth:** These programs will generate significant employment opportunities while empowering individuals to contribute to India's renewable energy transition.

2. National Institute of Solar Energy Upskilling Training Programmes

Key Training Programs Conducted by NISE

On-Campus Training Programmes

Held at NISE's Gurugram Campus, these programs are tailored to various skill levels and professional requirements.

- **Open to Graduate, Researcher, and Industry Official Training**

Individual participants.

Stakeholders nominated by their organizations.

Targets early-career professionals, researchers, and industry personnel seeking advanced technical and operational knowledge.

Focus Areas: Solar energy systems, renewable energy technologies, and industry-specific skill enhancement.

Designed to reduce the skill gap in the renewable energy sector.

- **Customized Training Programmes**

Offered on request by organizations, ensuring content is tailored to meet specific requirements.

Examples: Programs for corporate clients, utility operators, or regional energy bodies.

- **International Training Programmes**

Conducted under the Indian Technical and Economic Cooperation (ITEC) and other international programs sponsored by:

Ministry of External Affairs (MEA).

Ministry of New and Renewable Energy (MNRE).

Focus Areas: Solar energy technology transfer, project management, and global renewable energy trends.

- **Specialized Training for Defence Officers**

An annual program tailored for senior defence officers, focusing on the application of solar energy technologies in defence operations and infrastructure.

- **Master Trainers' Training Programme on Rooftop Solar Installations under PM Surya Ghar - Muft Bijli Yojana**

A Master Trainers' Training Programme focused on rooftop solar installations was conducted on June 24-25, 2024, at the National Institute of Solar Energy (NISE) in Gurugram. This program is designed to train trainers from the National Skill Training Institute (NSTI) of DGT, who will, in turn, provide training to technicians and installers for the PM Surya Ghar: Muft Bijli Yojana. This initiative supports the large-scale deployment of rooftop solar installations under the scheme and addresses the need for a skilled workforce.

Rajya Sabha Questions & Answers

National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Subject: Provisionally admitted questions for the Rajya Sabha, Starred / Unstarred Diary No. - U1907, Due for answer on 06-08-2024

Question a) Whether the government is aware of electronic and other toxic waste generated by solar panels and other renewable energy sources like wind power; and if yes, the details of such waste generated in the last five years.

Reply to a): The government is aware of the electronic and other toxic waste generated by solar panels. As of FY23, India has cumulatively generated about 100 kilotonnes (kt) of waste from its installed solar capacity of 66.7 GW¹.

Question b) Whether the government has a streamlined mechanism, policy, or proposal for the disposal of such waste; and

Question c) if yes, the details thereof;

Reply to b) and c): The Ministry of Environment, Forest and Climate Change has notified the E-Waste (Management) Rules, 2022 on 2nd November, 2022. Management of solar photo-voltaic modules/panels/cells has been added in Chapter V of the said rules. As per these rules, every manufacturer and producer of solar photo-voltaic modules or panels or cells shall:

- I. ensure registration on the portal;
- II. store solar photo-voltaic modules or panels or cells waste generated up to the year 2034-2035 as per the guidelines laid down by the Central Pollution Control Board in this regard;
- III. file annual returns in the laid down form on the portal on or before the end of the year to which the return relates up to year 2034-2035;
- IV. ensure that the processing of the waste other than solar photo-voltaic modules or panels or cells shall be done as per the applicable rules or guidelines for the time being in force;
- V. ensure that the inventory of solar photo-voltaic modules or panels or cells shall be put in place distinctly on portal; and
- VI. comply with standard operating procedure and guidelines laid down by the Central Pollution Control Board in this regard.

Further, Recycler of solar photo-voltaic modules or panels or cells shall be mandated for recovery of material as laid down by the Central Pollution Control Board in this regard.

Inputs for Parliament question Rajya Sabha diary no. 972.docx (22.8 kB)

Inputs for Rajya Sabha Unstarred Question Diary no.972 due for 11.02.2025

Q 1. The details of the share of solar energy to the total new and renewable energy production in the country;

Ans. Share of solar energy to the total new and renewable energy production in the country stands at 32.43% for the period April 2024 to Dec 2024¹.

Q 2. Whether it is a fact that there is a huge potential exists in the country to augment solar energy;

Ans. Yes.

Q 3. If so the details thereof;

Ans. The first solar PV potential map of India was developed by NISE in 2014. This comprehensive estimation included identifying suitable areas on wasteland for solar energy generation, assessing rooftop solar potential in urban areas, and aggregating the total solar potential for each state. The assessment revealed a total potential of **748.98 GWp** across the nation. The state-wise potential estimation of 2014 is given in Table 1.

Table 2: State wise Solar Potential of India 2014

State	Wasteland (sq km)	Solar power plant area (sq km)	Solar potential based on wasteland (GWp)	Rooftop (GWp)	Total solar potential (GWp)
Andhra Pradesh	26049	781	36.83	1.60	38.44
Arunachal Pradesh	5743.84	172	8.62	0.04	8.65
Assam	8778.02	263	13.17	0.59	13.76

Updated Solar Potential Assessment

Recognizing continuous improvement in Solar PV technologies particularly the availability of high efficiency and large-size PV modules, together with the updated wasteland data, National Institute of Solar Energy (NISE) has updated India's solar potential. The updated solar potential incorporates more advanced GIS based mapping of wasteland together with the parameters of high efficiency modules.

This assessment considers upgraded technological parameters such as **module wattage (545 W_p)**, **module efficiency (20%)**, and **module area (2.6 m²)**. The updated Solar potential of India-2024 for Ground mounted solar PV has already been submitted to the Ministry of New and Renewable Energy (MNRE) for further approvals. Furthermore, India's floating potential has also been evaluated and is ready for submission to MNRE.

Q 4. Steps taken by the Govt. to maximize the solar energy production in the country;

Ans. MNRE may provide the answer to this question.

Rajya Sabha Provisionally Admitted Question Starred/ Unstarred Dy. No.
U122 to be put up for 01.04.2025

Inputs from National Institute of Solar Energy (NISE),
Control Organization: Ministry of New and Renewable Energy (MNRE)

Question (a) What measures has the central government implemented in collaboration with state governments to encourage the use of solar-powered boats for fishing and cruising, considering that some state governments are already supporting this initiative?

Reply to (a):

MNRE may provide the answer.

Question (b) Is the central government improving research efforts for solar-powered boats? Explain in briefly.

Reply to (b):

As per the direction of MNRE, NISE is preparing a feasibility assessment of solar-powered boats for inland use.

In addition, a pilot project will also be proposed for demonstrating solar-powered boats for livelihood applications.

Dear Bala,

In reference to your mail on above subject matter, the input from NISE for part (d) is given below:

Q: (d) "the steps taken/being taken by the Government for creation of new testing facilities and upgradation of existing Testing Facilitates to ensure safe and secure operations under this mission across the country"

Input from NISE:

MNRE, on [04th July 2024](#), notified a Scheme titled "Funding of testing facilities, infrastructure, and institutional support for development of Standards and Regulatory framework" under the National Green Hydrogen Mission for implementation during the period 2024-26 at a total cost of Rs. 200 crores. The scheme will lead to establishment of new testing facilities and upgradation of existing ones so as to achieve self-sufficiency in the areas of testing & certification for Green Hydrogen value chain in the country. National Institute of Solar Energy (NISE), Gurugram is nominated as the Scheme Implementing Agency (SIA) for the Scheme.

NISE, on [15th August 2024](#), floated the Call for Proposal (CfP) inviting application for setting up New Testing Facilitates and for Upgradation of Existing Testing Facilities for components, technologies and processes being used in the Green Hydrogen Value Chain. The last date for submission of proposal was extended till [15th November 2024](#). NISE have received a total of 45 proposals (41 for New Testing Facility and 4 for Upgradation of Existing Facility) against the call and are being evaluated for issuing sanction.

NISE_Resposne_point no. 21.docx (16.7 kB)

NISE_Resposne_point no. 21.pdf (97 kB)

NISE's key activities & role in PM-KUSUM Scheme

National Institute of Solar Energy (NISE) actively engaged in PM-KUSUM and provides expert technical input in following activities:

1. NISE provides technical support in preparing the testing & specification guidelines for qualification of Solar water pumping systems under PM-KUMUM schemes (e.g., Guidelines & specifications issued on **17/07/2019** and **22/03/2023**).
2. NISE provides inputs to MNRE for inclusion of new and innovative Solar water pumping technologies in PM-KUSUM schemes, e.g. reciprocating pumps and micro pumps.
3. NISE conducts testing of solar pumps, modules, and other equipment to ensure they meet quality standards to ensure that the products used in the scheme are reliable and efficient.
4. Recently, NISE has prepared Star Labelling Framework for solar water pumping systems. This will empower farmers in choosing best-in-class SWP system under PM-KUSUM scheme.
5. Time to time, NISE provides technical inputs to stakeholders involved in the PM-KUSUM scheme and provides assistance with the design, installation, and maintenance, conducting visit of farmer to understand the SWP system.

NISE's key activities & role in PM Surya-Ghar Scheme

NISE supported PM Surya-Ghar scheme with key activities highlighted below:

1. NISE has supported in preparation of quality control guidelines for PV modules and Inverters under PM Surya-Ghar Scheme.
2. NISE being equipped with state-of-the-art PV modules and Inverter test facility, also assigned the task for handling the sampling and testing for the enlistment of Solar PV Modules and Inverter models from OEMs under the "PM-Surya Ghar: Muft Bijli Yojana," as per MNRE's Office Memorandum No. 318/29/2024-Grid Connected Rooftop, dated June 21, 2024.
3. NISE serves as the Scheme Implementation Agency (SIA) for the "Innovative Projects" component of the PM-Surya Ghar: Muft Bijli Yojana, as detailed in MNRE's order No. 318/17/2024-GCRT Division, dated March 16, 2024.
4. To ensure availability of trained manpower for installation and maintenance of PV systems under the scheme, NISE has mapped the Suryamitra Training Centres & PM Surya-Ghar Registered vendors.
5. To further address the demand for skilled workforce, NISE developed and proposed following training modules which were approved by MNRE on October 9, 2024, and implementation is now underway:
 - a) Solar PV Installers:** To Train individuals in the installation of solar PV systems, focusing on safety, efficiency, and quality (Target: 20,000 candidates)
 - b) Rooftop Solar Supervisors:** To Equip supervisors with advanced knowledge for overseeing rooftop solar installations, including project management, troubleshooting, and compliance (Target: 10,000 candidates)
 - c) On-Job Training (OJT) for Trained Installers/Suryamitras:** To Provide practical, hands-on experience to existing trained personnel, enhancing their skills for real-world challenges (Target: 25,000 candidates)

A provisionally admitted Rajya Sabha Question- Starred Dy. No. 1480 for reply on 28.11.2024 regarding contractual appointments and regular/permanent appointments in Central Government has been received.

2. The question seeks to know:

- (a) Whether Government has appointed more employees on contractual basis than regular/permanent appointments since 2019 till date;
- (b) if so, the reasons for decline in regular/permanent appointments in Central Government;
- (c) if not, the number of contractual appointments and regular/permanent appointments in Central Government separately since 2019 till 1st November, 2024, Ministry/Department/PSU-wise and year-wise?

3. It is requested that consolidated input in respect of whole Ministry/Department including Attached/Subordinate Offices, Autonomous Bodies and PSUs under administrative control of your Ministry, may be furnished to this Department, for framing a reply to the Question, latest by **18.11.2024(FN)** on the following e-mails - js.kanth@nic.in, gaurav.0203@gov.in.

Sir,

Reference to trail mail, following details are being submitted for further reference please:

1.As the NISE have only few sanctioned strengths of technical and admin staffs, thereby the contractual appointments were done in consolidated remuneration more than regular appointment as same were required from time to time based on functional requirement of the institute along with compliance of task in various parameters (Technical/Admin) assigned by MNRE.

2.The regular positions (41) of NISE were only sanctioned comprised of admin and technical staffs. The details of same are also enclosed in attached sheet regarding work in position of regular and contractual staffs w.e.f.01.01.2019 to till date.

Subject : Lok Sabha Starred Question with Dy. No. 8070 regarding "Filling up of Vacancies through Outsourcing" - reg.

The undersigned is directed to say that Lok Sabha Starred Question with Dy. No. 8070 regarding "Filling up of Vacancies through Outsourcing" for answer on **19.03.2025** has been received.

2. The question seeks to know:

- a) Whether the Government is filling regular posts through outsourcing in Ministries/Departments/Quasi-Government and Public Sector Undertakings;
- b) If so, the details thereof along with the reasons therefor;
- c) whether there is a shortage of required candidates to fill up the vacancies on regular basis in Ministries/Departments/Semi-Government Officers and Public Sector Undertaking across the country;
- d) if not, the reasons for filling up the said posts through outsourcing;
- e) whether the Government filling up the posts through outsourcing to discontinue reservation policy;
- f) if not, whether the existing reservation policy is also applicable to employees appointed in Government, Semi-Government Offices and Public Sector Undertakings through outsourcing in the country; and
- g) if not, the reasons therefor and the steps taken to implement the reservation policy on made through outsourcing appointment?

3. It is requested that consolidated input in respect of Ministry/Department including Attached/Subordinate Offices, Autonomous Bodies and PSUs under your administrative control, may be furnished to this Department, for framing a reply to the Question, latest by **12.03.2025** on the following e-mails - js.kanth@nic.in, gaurav.0203@gov.in.
